- Inflate the tires to their recommended pressures.
 Place the ATC on blocks to raise all three tires off the ground.
- Cover the ATC (don't use plastic or other coated materials) and store in an unheated area, free of dampness with a minimum of daily temperature variation. Do not store the ATC in direct sunlight.

Removal from Storage

- 1. Uncover and clean the ATC. Change the engine oil if more than 4 months have passed since the start of storage.
- 2. Check the voltage and slow charge the battery if it is below 12.8V. Install the battery.
- 3. Drain any excess aerosol rust-inhibiting oil from the fuel tank. Fill the fuel tank with fresh gasoline.
- Perform all Pre-ride Inspection checks (page 28).
 Test ride the ATC at low speeds in a safe riding area.
