

Transmission Oil

Transmission Oil Recommendation

Use only high detergent, premium quality motor oil.

The regular use of special oil additives is unnecessary and will only increase operating expenses.

Transmission oil should be changed at the intervals prescribed in the maintenance schedule on page 37.

NOTE:

Non-detergent and low quality oils are specifically not recommended.

Viscosity

Viscosity selection should be based on the average atmospheric temperature in your riding area. Change to the proper viscosity oil whenever changes in average atmospheric temperature require it.

Recommended oil viscosity:

General, all temperatures

SAE 10W-30 or SAE 10W-40

Alternate:

Above 59°F (15°C)	SAE 30
32° (0°) to 59°F (15°C)	SAE 20 or 20W
Below 32°F (0°C)	SAE 10W
