

## STARTING THE ENGINE

Always follow the proper starting procedure described below.

### **WARNING**

- **Never run the engine in an enclosed area. The exhaust contains poisonous carbon monoxide gas that can cause loss of consciousness and lead to death.**
- **Do not try to start the motorcycle with the transmission in gear. You may injure yourself or damage the motorcycle.**

### **Preparation**

Before starting, insert the key, turn the ignition switch ON and confirm the following;

- The Transmission is in NEUTRAL (neutral indicator ON).
- The engine stop switch is at RUN.
- The fuel cock is ON.
