

⚠ WARNING

- * **Improper tyre inflation will cause abnormal tread wear and create a safety hazard. Underinflation may result in the tyre slipping on, or coming off of the rim causing tyre deflation that may result in a loss of vehicle control.**
- * **Operation with excessively worn tyres is hazardous and will adversely affect traction and handling.**
- * **Do not attempt to patch a damaged tyre or inner tube. Wheel balance and tyre reliability may be impaired.**

Replace tyres before tread depth at the center of the tyre reaches the following limit:

Minimum tread depth	
Front:	1.5 mm (1/16 in)
Rear:	2.0 mm (3/32 in)

Cracks and Damage

Check the tyre tread and sidewalls for conspicuous cracks (1) or other damage (2).

⚠ WARNING

- * **Tyres that are cracked or damaged are a safety hazard. They may lose pressure rapidly, and a loss of vehicle control could result.**

(1) Crack

(2) Damage
