

Reverse Riding

For reverse riding practice, make sure there are no obstacles or people in the area.

1. Make sure the transmission is in neutral and set the parking brake.
2. Start the engine and release the parking brake.
3. While the engine is idling, press the reverse selector knob, squeeze the rear brake/parking brake lever and depress the gearshift pedal into the reverse gear.
4. Release the rear brake/parking brake lever.
5. Ride the TRX cautiously in reverse by gradually opening the throttle.

WARNING

- * *When backing up, open the throttle carefully to ride slowly and safely, being careful that there are no obstacles or people behind you.*
- * *Avoid sudden application of the throttle or abrupt turns.*
- * *Close the throttle and apply both front and rear brakes carefully to stop the TRX when riding in reverse. Applying the rear brake alone may cause the front wheels to lift off the ground.*
