

TIRES

The FOUR TRAX 200SX is equipped with low pressure tubeless tires to provide a comfortable ride. Although the tires are designed specifically for vigorous off-road use, they are not immune to punctures. Always select your riding area with care.

WARNING

* *The FOUR TRAX is not designed to be ridden on paved surfaces. Handling and control will be severely affected.*

Check tire pressure frequently with the air pressure gauge supplied with this FOUR TRAX.

For normal use, the tires should be inflated to the recommended pressure. A manually operated tire pump should be used rather than the high pressure systems found in service stations. This will minimize the possibility of tire damage from overinflation.

NOTE:

- * Tire pressure should be checked when the tires are "cold," before you ride.
- * Check the tire pressure before you ride.
