

Lubrication and Cleaning

Lubricate every 30 days of riding or sooner if chain appears dry. The O-rings in this chain can be damaged by steam cleaning, high pressure washers, and certain solvents.

Clean the chain with kerosene. Wipe dry and lubricate only with Honda Chain Lube or an equivalent drive chain lubricant which specifies use for O-ring chains. Other commercial chain lubricants may contain solvents which could damage the rubber O-rings.

Replacement chain:

DID520V6 or RK520 SM0Z10
