

# Load Limits & Guidelines

## Load Limits

Following are the load limits for your ATV:

There are limits to how much weight can be carried on your ATV and be pulled in a trailer.

The following load limits apply to standard equipment only. Modifying your ATV, using non-standard equipment, or riding on terrain that is not flat and smooth could further reduce these limits.

maximum weight capacity      485 lbs (220 kg)  
 (includes the weight of the rider,  
 all cargo, and accessories.)

front cargo rack weight limit      = 66 lbs (30 kg)  
 rear cargo rack weight limit      = 133 lbs (60 kg)  
 tow weight limit                      = 850 lbs (385 kg)

(Combined weight of the trailer  
 and all cargo in the trailer)

tongue weight                          = 30 lbs (14 kg)  
 (Weight on the trailer tongue)      recommended  
 tongue and rear cargo weight      = 133 lbs (60 kg) maximum  
 (Combined weight on the trailer  
 tongue and on the rear cargo  
 rack)

Tongue weight can be measured with an ordinary bathroom scale. Place the scale under the tongue, using either a tongue jack or other support to keep the trailer level.

The weight of added accessories will reduce the maximum cargo weight you can carry.
