

## **PARKING**

Always choose a level place to park. After bringing your FOURTRAX to a stop, hold the brakes while you shift into neutral. Then set the parking brake and turn the ignition switch OFF. If you're through riding for the day, also turn the fuel valve OFF.

If it is necessary to start the engine when your FOURTRAX is stopped on a grade *in gear*, rock the vehicle back and forth to allow shifting the transmission into neutral.

While reading this manual, remember:

### **▲WARNING**

**Indicates a strong possibility that serious injury or death may result if instructions are not followed.**
