

## CLEANING

Clean your motorcycle regularly to protect the surface finishes and inspect for damage, wear, and oil seepage.

### CAUTION:

- \* **Avoid spraying high pressure water (typical in coil-operated car washes) at the following areas:**

Wheel Hubs	Ignition Switch
Muffler Outlet	Steering Lock
Under Fuel Tank	Drive Chain
Carburetor	Instruments
Under Seat	

1. After cleaning, rinse the motorcycle thoroughly with plenty of clean water. Strong detergent residue can corrode alloy parts.

### NOTE:

- \* Clean the plastic parts using a cloth or sponge dampened with a solution of mild detergent and water. Rub the soiled area gently rinsing it frequently with fresh water.

2. Dry the motorcycle, start the engine, and let it run for several minutes.
3. Lubricate the drive chain immediately after washing and drying the motorcycle.
4. Test the brakes before riding the motorcycle in traffic. Several applications may be necessary to restore normal braking performance.

### **▲ WARNING**

- \* **Braking performance may be impaired immediately after washing the motorcycle.**
