

To fill the oil tank to the upper level, oil should be added in two steps.

5. With the motorcycle upright on firm level ground.
6. Fill the oil tank with the specified oil (See page 77) up to the upper level mark and install the oil filler cap/dipstick.

7. Start the engine and let it idle for 5 minutes. During idling, support the motorcycle in an upright position on a firm, level surface to assure an accurate oil level reading. Stop the engine.
8. Immediately remove the oil filler cap/dipstick and add the specified oil up to the upper level mark.

NOTICE

Running the engine with insufficient oil can cause serious engine damage.

9. Reinstall the oil filler cap/dipstick. Check for oil leaks.
