# If a Fuse Blows
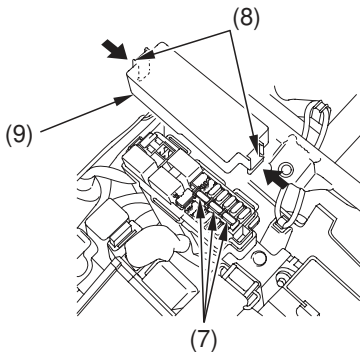

UNDER FRONT SEAT

(7) spare fuses
(8) tabs
(9) fuse box cover

*Circuit Fuse Access:*
6. Release the tabs ( 8 ), then remove the fuse box cover ( 9 ).
7. To check or replace a circuit fuse, pull the old fuse out of its retaining clips. Look for a burned wire inside the fuse. If the fuse is blown ( 10 ), replace it with a spare fuse ( 7 ) of the same rating.

If you do not have a replacement fuse with the proper rating for the circuit, install one with a lower rating.

NOTICE

*Replacing a fuse with one that has a higher rating greatly increases the chance of damage to the electrical system.*
