

## Compression Damping

CBR1000RR/RA

You can adjust the compression damping by the COM adjuster to suit the load or the road surface.

The COM adjuster has 4 1/2 turns.

Turn clockwise to increase compression damping (hard), or turn counterclockwise to decrease compression damping (soft).

The standard position is 3 turns from the full hard position.

### NOTICE

Do not turn the adjuster beyond its limits.

### NOTICE

The rear shock absorber damper unit contains high pressure nitrogen gas. Do not attempt to disassemble, service, or improperly dispose of the damper. See your dealer.
