

Using the kickstarter

Lightly depress the kickstarter until resistance is felt. Then let the kickstarter return to the top of its stroke. With the throttle closed, operate the kickstarter with a rapid and continuous motion.

- ▶ Do not operate the kickstarter while the engine is running as engine damage could result. Do not apply excessive force on the kickstarter.
- ▶ Fold up the kickstarter after the kickstarter is returned to the pedal stop.

If you cannot restart a warm engine:

Rotate the throttle $1/8 - 1/4$ turn while starting the engine.
