

Rear Seat Conversion (SXS1000M5P/M5D only)

Unfolding

1. Park your Honda SXS on a firm, level surface, and roll up the rear side nets (page 53).
2. Open the rear door (page 45).
3. Lift up the rear seat back until it latches into position.
4. Unhook the strap ring from the stay.
5. Fold down the lower seat back and push it to snap the tabs into slots.

Do not open the rear doors while the cargo bed is raised. Opening the rear doors while the cargo bed is raised, will cause the seats to flip up unexpectedly.

Fold up the rear seats only while the cargo bed is in the lowered position.
