

Loading Cargo

Loading Guidelines

- Make sure the tires are properly inflated (page 193).
- Place all items on the floor of the cargo bed, and as far forward and centered as possible.
- Use the tie-down hooks (page 70) to secure any items that could shift position while you are driving.
- Do not let items extend over the side rails, as they could get caught on something.
- Be aware that carrying tall, heavy items will significantly raise the vehicle's center of gravity, increasing the chance of a rollover.
- Never let a passenger ride in the cargo area or hang onto the side of the vehicle, even for a short distance. The person could be thrown off the vehicle or cause a crash.
- Before driving with heavy cargo, shift the shift select lever into low-range (L) position.

3 WARNING

Driving with a passenger in the cargo area can result in very serious injury or death if the person is thrown against the vehicle or out of the bed.

A passenger should only ride in the passenger's seat and wear their seat belt properly.
