

Air Cleaner

Refer to *Safety Precautions* on page 115.

This vehicle is equipped with a viscous type air cleaner which cannot be cleaned with compressed air or any chemicals without degrading its performance.

Service the air cleaner more frequently if you drive in unusually wet or dusty areas. Your dealer can help you determine the correct service interval for your driving conditions.

Your Honda SXS's air cleaner has very specific performance requirements. Use a new Honda Genuine air cleaner specified for your model or an air cleaner of equal quality.

NOTICE

Using the wrong air cleaner may result in premature engine wear.
