

# Load Limits & Guidelines

---

## Load Limits

Following are the load limits for your ATV:

There are limits to how much weight can be carried on your ATV and be pulled in a trailer.

The following load limits apply to standard equipment only. Modifying your ATV, using non-standard equipment, or riding on terrain that is not flat and smooth could further reduce these limits.

**maximum weight capacity**      **573 lb (260 kg)**

(includes the weight of the rider,  
all cargo, and accessories.)

**front cargo rack weight limit**      **= 99 lb (45 kg)**

**rear cargo rack weight limit**      **= 187 lb (85 kg)**

**tow weight limit**      **= 1,322 lb (600 kg)**

(Combined weight of the trailer  
and all cargo in the trailer)

**tongue weight**      **= 30 lb (14 kg) recommended**

(Weight on the trailer tongue)

**tongue and rear cargo weight** **= 187 lb (85 kg) maximum**

(Combined weight on the  
trailer tongue and on the rear  
cargo rack)

Tongue weight can be measured with an ordinary bathroom scale. Place the scale under the tongue, using either a tongue jack or other support to keep the trailer level.

The weight of added accessories will reduce the maximum cargo weight you can carry.
