Changing Engine Oil & Filter

Changing the oil and filter requires special tools. We recommend that you have your vehicle serviced by your dealer.

Use a new Honda Genuine oil filter or equivalent specified for your model.

NOTICE

Using the wrong oil filter can result in serious damage to the engine.

- 1. If the engine is cold, idle the engine for 3 to 5 minutes.
- 2. Turn the ignition switch to the OFF position and wait for 2 to 3 minutes.
- 3. Place your vehicle on a firm, level surface.
- 4. Place a drain pan under the drain bolt.

 Remove the oil fill cap/dipstick, drain bolt, and sealing washer to drain the oil.
